geek girl

Empowering women through technology, one Geek Girl at a time.

Ad Requirements

Accepted File Formats

- Artwork may be submitted as PDF, EPS, TIFF or JPEG.
- Flatten transparency in PDF files (PDFX-1a will automatically flatten and convert to CMYK)
- All ads must be provided at 300 ppi or higher. Artwork with resolution less than 300 ppi may print with jagged or blurred edges. (Interpolating image size from 72 ppi to 300 ppi does not constitute a high resolution image and will result in a low quality image)

File Setup

- Setup artwork to ad size.
- Full page, full bleed ads must include crop marks and 1/8" bleed for print along all edges.
- Do not use crop marks for ads without bleeds.

Color

- Ads will be printed digitally.
- Leave PMS colors as spot colors for the best output.
- Color matching: we cannot guarantee color matching to spot colors. Due to variances in color management, artwork may print differently than it appears on your monitor. Our goal is to provide realistic color output.
- CMYK and RGB images are acceptable. NOTE: Many RGB colors cannot be reproduced in CMYK and greater color shifts can be seen. For more predictable color, convert to CMYK.

Fonts

- Convert to outlines if possible.
- Bold & Italic: ensure that your printer font has these styles built in before you use bold and/or italic from your program's style menu.

Professional Design Services

If you would like to place an ad, but don't have the resources to submit one yourself, our special Geek Girl designers can create one for you. You will receive a PDF proof for approval prior to printing and can send your logo, pictures and copy for use in the ad. Pricing \$100/hour with a minimum charge of \$75 in addition to the price of your ad. Please contact one of the designers we work with:
